

DEREK HESLOP, B.ARCH, MAAA, MRAIC
PARTNER

QUALIFICATIONS

The ability to creatively bridge from fundamental sustainable design principles in the early stages of concept design to the detailed design, coordination and integration of high-performance building systems during contract documentation is a key quality of Derek's 25 years of design experience. His work has focused on complex, multi-use facilities requiring sophisticated, interacting building technologies and includes research laboratories and pilot plants for major urban health facilities. He has 10 years' experience designing high-performance, sustainable workplaces for private and public sector clients. These projects have benefited from Derek's knowledge of the C-2000, CBIP and LEED® programs, and from his practical experience with the integrated design process. His most recent project includes the largest Building Integrated Photovoltaic installation in the country.

EDUCATION

- 1978 Bachelor of Architecture, Carleton University, Ottawa, ON

PROFESSIONAL MEMBERSHIPS

- Member, Royal Architectural Institute of Canada
- Member, Alberta Association of Architects
- Member, Sustainable Building Symposium
- Director, Design Aging Network, University of Alberta
- Past Director, Edmonton Society for Urban and Architectural Studies

AWARDS & ACHIEVEMENTS
